

Get trading

We built Deriv for traders.

A place where traders can discover the widest selection of derivatives to trade simply, flexibly, and reliably.

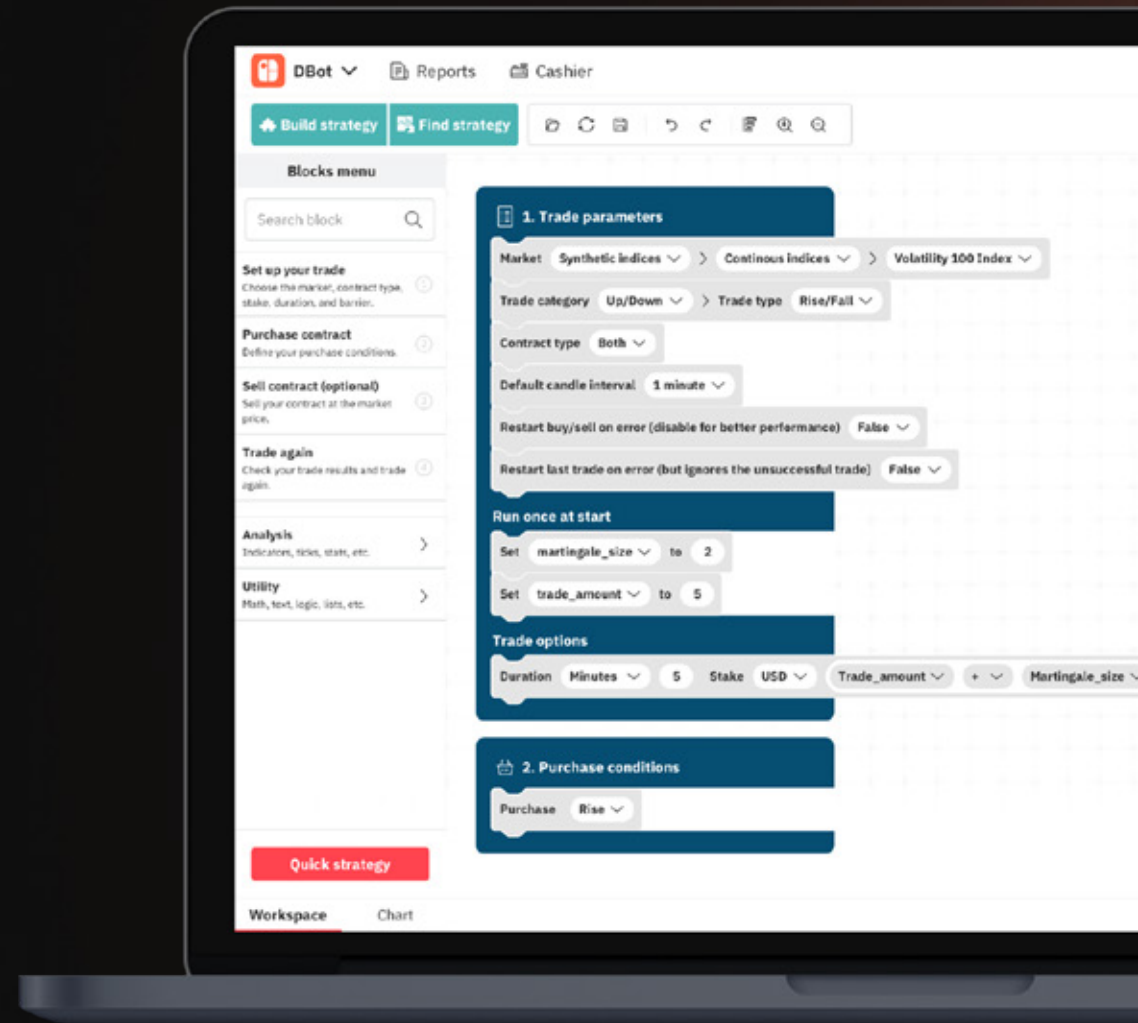

Get trading *simply*

We can't make trading easy. But we can make it simple. We're here to get you trading hassle-free and in the fewest taps on your mobile, or clicks on your computer. We want anyone to be able to trade from anywhere. We offer many convenient options to get funds in and out of your account, combined with a low minimum deposit and low minimum trade amounts. You can even automate your trading strategies with Lego-like simplicity, and without a lick of code. Simple=good.

Get trading *flexibly*

Three platforms, three categories of trade types, four markets, over a hundred tradable assets, and trade durations from 1 second to 365 days - there are endless possibilities to trade the way you want. And with three customisable chart types and hundreds of indicators, price bands, overlays, and other tools, you can make better trading decisions. You can even trade 24/7 with our exclusive synthetic indices that simulate the movements of real-world markets.

DBot - Automate your trading ideas without coding

MetaTrader 5 (DMT5) - The platform
of choice for professionals

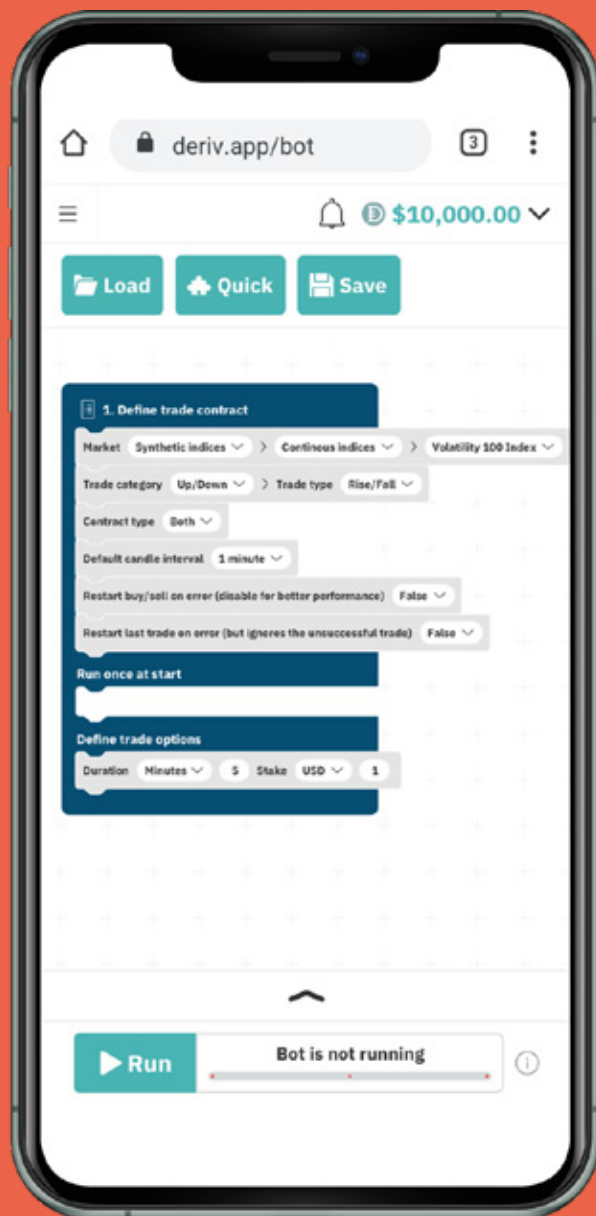

Get trading *reliably*

We're an industry pioneer. Our 20-year record of delivering quality service and innovative products is unmatched. More than a million traders from around the globe have trusted us with their money and traded with us. Our teams continue to work around the clock to ensure that you can get trading securely, anytime, anywhere, and every time. And should you get stuck, we have best-in-class customer support to help you get (back to) trading.

DTrader

- ✓ Trade in the moment with powerful, inline charts and indicators of your choice.
- ✓ Trade options on financial or synthetic markets.
- ✓ New multipliers offer you the simplicity of options trading with the upside of margin trading.

DBot

- ✓ Automate your trading ideas without writing code.
- ✓ Build a bot visually by moving and connecting blocks — a bit like playing with Lego.
- ✓ Don't start from scratch. Load, customise, and test pre-built strategies like Martingale, D'Alembert, and Oscar's Grind.

MetaTrader 5 (DMT5)

- ✓ Advance to the all-in-one FX and CFD trading platform for professionals worldwide.
- ✓ Choose a Financial, Financial STP, or Synthetic account to trade the way you want.

Our products

Forex

Trade the world's largest financial market with popular and exotic forex pairs.

Synthetic indices

Trade a synthetic market that simulates real-world market movements.

Commodities

Trade the natural resources that are central to the world economy.

Stock indices

Trade on broader market trends and diversify your risk with stock indices.

Margin

Enjoy high leverage and low spreads to increase your returns when the market moves in your favour.

Options

Predict and profit from market movements without buying an underlying asset.

Multipliers

The upside of margin trading and simplicity of options - get the best of both with multipliers.
